INTRODUCTION

Artificial Intelligence student at THD, that loves making new and innovative projects. Passionate about the field of artificial intelligence and looking into the next generation of innovative technology.

EDUCATION

Bachelor of Artificial Intelligence, Technische Hochschule Deggendorf 10/2022 - Present
Deggendorf, Germany
Current GPA (as of 06/11/2025): 1.7

High School Studies, Hasan Riza Pasha High School 09/2019 - 06/2022
Shkodër, Albania
GPA: 1.0

EXPERIENCE

Werkstudent Machine Learning Engineer Apr 2024 - Present
Siltronic AG *Burghausen, Bavaria, Germany (Hybrid)*

- Leveraged machine learning techniques for autonomous anomaly detection in silicon wafer production, enhancing quality control and manufacturing efficiency.
- Engineered dynamic, real-time data visualization dashboards using Plotly Dash and Django, efficiently handling and plotting thousands of data rows.

Skills and Technologies: Python, SQL, Django, Plotly, JMP, DBeaver, Machine Learning, Data Analysis

Co-Founder & CTO Nov 2023 - Present
MediSync AI *Cologne, North Rhine-Westphalia, Germany*

- Co-founded and developed MediSync AI, a solution for transcribing doctor-patient conversations and converting real-time information directly to electronic patient records.
- Developed the MediSync dashboard in React, internal APIs with FastAPI, our AI speech transcription model based on Whisper and medical notes generation system equipped with a named entity recognition system.

Skills and Technologies: React, NodeJS, Python, FastAPI, STT, Redis, Celery, Linux

Full Stack Web Developer Jun 2021 - Nov 2023
Utopian Global *Part-Time, Canada (Remote)*

- Developed 20+ different web and software projects.
- Built fully customizable web themes, plugins, and UI components.

Technologies: PHP, Javascript, React, WordPress, Shopify, NodeJS, Web Development

-

PROJECTS

Autonomous Jetson Nano RC Car

May 2024 - Jun 2024

Together with my team at TH Deggendorf, we developed a fully autonomous RC car equipped with stereo vision. The car uses two cameras to generate a depth map based on the SGBM algorithm and follows roads using a CNN model we implemented and trained with our own collected and processed data. This project showcases advanced computer vision and machine learning techniques for autonomous vehicles.

Technologies: Computer Vision, Tensorflow, Python, SGBM, Convolutional Neural Networks (CNN), Data Collection, Machine Learning

Live AI Interview

Sep 2023 - Present

A live interview AI avatar chatbot that can participate in interviews on your behalf. This innovative solution answers questions related to your resume, responds to interviewer queries, and saves interactions for later review. The frontend is built with React, Vite, ThreeJS, and React Three Fiber, while the backend is an Express and NodeJS server communicating through WebSockets.

Technologies: Express.js, WebSocket, React.js, Web Application Development, AI, JavaScript, Microsoft Azure, Three.js

[GitHub](#)

Heart Attack prediction

Nov 2023 - Jan 2024

Heart attack prediction through a RandomForestRegression algorithm equipped with a GUI and visualizations.

Technologies: Python, Scikit-learn, PyQt6, Machine Learning [GitHub](#)

Jobjet

Oct 2023 - Jan 2024

JobJet is a career service NLP chatbot that helps job seekers find the right job. It is built and trained using Rasa and Python.

Technologies: Python, Rasa, NLP

SKILLS

Technical Skills	Machine Learning, Programming (Python, JS), Data Analysis, Software Development
Soft Skills	Problem-solving, Fast learner, Collaboration, Research

CERTIFICATES AND ACHIEVEMENTS

HEALTH-i Award 2025	09/2025
Microsoft Certified: Azure AI Fundamentals	05/2025
Nvidia: Accelerating End-to-End Data Science Workflows	01/2025
CERN Spring Campus	03/2024

LANGUAGES

English	Native or Bilingual Proficiency
German	Limited Working Proficiency
Turkish	Limited Working Proficiency
Italian	Elementary Proficiency
Albanian	Native or Bilingual Proficiency

INTERESTS

Artificial Intelligence, Machine Learning, Automation, Data Analysis, Data Science, Web Technologies
